## EXPERIENCE

---

**Cape Consulting** | Wenham, MA

June 2025-Present

*Software Developer and IT Support*

- Developing, planning, and designing full stack healthcare web and native apps using React, React Native, Laravel PHP, NestJS, and PSQL, including managing AWS Infrastructure and pipelines.
- Assisted with A/V and Network Infrastructure installation and setup at a variety of local businesses.
- Managed the support queue and Wordpress and Squarespace websites for dozens of clients.

**Gordon College Center for Technology Services** | Wenham, MA

January 2024-May 2025

*Cyber Security Intern*

- Oversaw the triage and resolution of the backlog of automated security vulnerability reports for campus on-premises and cloud systems.
- Engineered Powershell scripts to automate the investigation and quarantine of user accounts affected by phishing and business email compromise attacks.

**NearSpace Education** | Upland, IN

Summer 2024

*STEM Education Intern*

- Developed and taught STEM curricula for 45+ 6-12 grade students covering programming, electronics, soldering, the engineering design process, CAD, 3D printing, high altitude balloon launches, and more.
- Reconfigured the wireless LAN to configure and operate 5 3D printers, utilized OnShape CAD software.

**Gordon College Computer Science Department** | Wenham, MA

Summer 2023

*Summer Practicum Software Developer*

- Development on a student built React web app with over 1000 daily users called Gordon 360.
- Practiced Agile methodology to build new features, communicating with dozens of stakeholders and peer developers in daily stand-ups and bi-weekly review/planning meetings.
- Formed a feature team of 3 students to refactor 1000s of lines of CSS to use custom properties to add appearance and dark mode settings to the website. See my [Linkedin](#) for more about the project.

**Gordon Police Department** | Wenham, MA

May 2019 – Present

*Head Dispatcher*

- Managed a team of 10-12 student police dispatchers to assist services of the campus police department, including emergency response, phone customer service, and radio communication.
- Interviewed candidates, made hiring decisions, and organized training for 30+ student workers during my tenure.
- Scheduled shifts using JS scripting to streamline the process, saving ~75% of the per semester setup.
